

Auto Restart Services

<https://www.redhat.com/sysadmin/systemd-automate-recovery>

1) Edit elasticsearch service unit file using the following command

```
systemctl edit elasticsearch.service
```

2) Now, add the following lines in the unit file.

```
[Service]  
Restart=always
```

3) Refresh the unit file using command

```
sudo systemctl daemon-reload
```
